

Note to Readers: The original pre-interview questionnaire contained questions related to the *key facets* we present in our **Taxonomy of Requirements changes in Agile Contexts**. We did not incorporate the data related to the *key facets* collected through this questionnaire since even though the choices given were the *key facets*, the questions were on *change requests* which we defined differently to requirements changes. However, below we present only the questions related to the information we used and presented in this particular study.

Pre-Interview Questionnaire

This form is intended to gather the basic information of the participant, company, team and the Projects.

Note! We assure details of the participants, their companies, and all other confidential information shared will be kept confidential. The names and details of the participants will not be specified in any of the publications or report.

Definition:

Change Requests: The requests of changes made by the client/ product owner to an implemented requirement of the product

*Mandatory

#	Question	Choices	Question Type
Personal Information			
1	Full Name*	NA	Open-ended (Text entry)
